

Quality Policy

Ossiform aims to improve the lives of people with bone defects by providing patient specific, natural, and resorbable bone implants to reduce complications, improve functional and aesthetic outcomes and obtain faster recovery.

Ossiform is committed to provide high quality 3D printed natural bone implants that meet or exceed the expectation of our customer by continuously improving our products, services and QMS while meeting relevant quality standards and current requirements for domestic and international regulation.

Ossiform

Ossiform is dedicated to improving the lives of people with bone defects. We provide patient specific, natural, and resorbable bone implants to reduce complications, improve functional and aesthetic outcomes and obtain faster recovery.

We are continuously working to redefine bone replacements through progressive research and close collaboration with physicians and industry partners. Our patient-centric approach and commitment to innovation, quality, and progress steer our efforts to provide best-in-class implant solutions that facilitate the natural forming of new bone.
