

Revised 2026.04.10

Quality Policy

Ossiform aims to improve the lives of people with bone defects by providing structural bioactive bone substitutes and surgical instrumentation to reduce complications, improve functional outcomes, simplify complex procedures, and accelerate recovery.

Ossiform is committed to provide high quality bone substitutes that meet or exceed the expectations of our customers by continuously improving our products, services, and QMS while meeting relevant quality standards and current requirements for domestic and international regulation.

Ossiform

Ossiform® is a British-Danish MedTech company dedicated to improving the lives of people with bone defects. We are forming a new generation of structural bioactive bone substitutes to reduce complications, improve functional outcomes, and accelerate recovery.

We are continuously working to redefine bone replacements through progressive research and close collaboration with physicians and industry partners. Our patient-centric approach and commitment to innovation, quality, and progress steer our efforts to provide best-in-class implant solutions that facilitate the natural forming of new bone.
